

SIZE & FITMENT GUIDE

When deciding which size to buy, please ensure that you measure the neck of your animal and you select the collar that matches the size of your animal's neck. It is best to choose a size slightly larger or if on the top of the range for that particular size to go for the size larger as it is not advised to select a size of collar that could potentially constrict or cause irritation around the animals neck or cause discomfort when on a lead.

Trion:Z pet collars are currently available in 4 sizes.

Size	Dimensions	
Small	25 - 35cm	10 – 14 inches
Meduim	35 - 45cm	14 – 18 inches
Large	45 - 55cm	18 – 22 inches
Extra large	55 - 65cm	22 – 26 inches

When measuring for a collar, please ensure there is room to insert your fingers between the collar and the animal.

Trion:Z Pet Collars should be worn lightly touching the skin and should not be too tight as a normal collar would be worn.
